

As I Evolve: TASK 3

- A) Recently, after I attended the session by Ms.Santhya Vikram , I looked around my hostel surroundings. I found a girl (daughter of a working woman) is alone and seeing students eating different kinds of chocolates with eyes. I went to canteen and bought a big chocolate and gifted to her.Firstly, she hesitated to take it but with her mother permission she took the chocolate and her expression is priceless. I felt so happy to see the happiness on her face and it made my day. I was not able to tell her any stories or something.But I had a nice experience last semester during my NSS camp in nearby village of Ettimadai. Our NSS Unit IV went to a government school and renovated it. During those three days, I had a chance to interact with kids of all backgrounds. We have taught them moral stories, created awareness regarding health and cleanliness through vedios and conducted a general quiz. We made them play different games and they enjoyed a lot.Those three days of volunteering gave me fulfilment and happiness. The kids from rural side are refrained from our modern education system (of pressure and competition)which astonished me in a way as I was brought up in a place where most of people go to private schools.This taught me the happiness in volunteering and interaction of kids gave me happiness and I have learnt so many lessons from them.We start from kids , we will think all are our friends, then becomes selfish and thinks what I get if I do that and revolve arounf things like money, fame and love.We make friends for attaining these things one or another.In such world, they reminded my childhood of true love and friendship.I decided to spread positivity and love everyone without return.This changed me as a person and I am thankful to them.

B).My dream

My aim is to establish a company like Google/ Instagram or Microsoft /Nvidia /Tesla and solve real-life problems in society, making it a better place to live and let others live. My aim to make nature clean ,green and lively again. Hence I am doing projects like RIVERANT, SCAVENGER, and Smart Pattar which are social impact problems concentrating on Cleanliness. I am neither a communist nor socialist nor capitalist but a humanitarian. I want to be the richest man and do philanthropic activities throughout my life. I want everybody to live happy and peaceful. I want to be a storyteller and motivational speaker who can impact millions. I want to be a good human and when I leave the world behind, my body should be wrapped in tricolor and my family should not be limited to 4/5 but the whole of India and the world should feel that they have lost a gem-like people are feeling for Shri Ratan Tata ji today.I have mentioned aim not dream because “ dream bas dekthe haate hai, aim achieve kiya jata hai”.

Jai hind!
